Watch the techniques demonstrated in easy-to-follow videos.

Enjoy hours of live recorded multi-track audio.

Song looping lets you highlight and repeat any section of music you wish to practice.

Instructor advice is only a click away.

Play along with over 40 jam tracks!

Slow the music down with variable-speed MIDI tracks.

Music tracking highlights notes as they are played.

77 Pop-Punk Progression

The following example is a progression in the style of modern radio-friendly punk rock groups like Link 182, SR 71 and Sum 41. Use movable power chords to play all the chords. We've included a grid to help you remember the power chord locations. For the D5, you can play a power chord rooted on either of the notes shown; there might be some advantage to using the 6th string D5 since you won't have to mute the 6th string.
